

ADVANTAGES

NEVER TOWING WATER BOXES

With the Membratech® A-Series, annoying box towing is a thing of the past. Use the freed up storage space again according to your ideas.

UP TO 12.000% PROFIT

Thanks to their high efficiency, the Membratech® A-Series allows you to enjoy pure drinking water in spring water quality for approx. 5 cents/liter.

A NEW WORLD OF FLAVORS

Indulge your guests with freshly prepared food and drinks. Pure water significantly improves the taste of your food and drinks.

ATTRACTIVE LEASING CONDITIONS

Benefit from our attractive leasing conditions and secure your Membratech® A-Series from as little as EUR 70,- per month (ONLY IN GERMANY)

LOCATIONS

The Membratech® A-Series is now being used very successfully around the globe on 4 continents. Even in India, Sri Lanka, South Africa or North America, it provides reliable services despite the sometimes difficult water conditions and generates pure drinking water in spring water quality free from viruses, hormones and pharmaceutical residues.

THE A-SERIES

The core components of the Membratech® A series are their two high-performance spiral membranes. Thin film layers are rolled up and pressed in a cylinder. Then water is forced through the membranes with extremely high pressure. They catch impurities that are larger than the hydrogen molecules. As a result, water comes out at the end, which has a purity of up to 99%.

- ✓ The Membratech® A-Series removes even the smallest molecular foreign substances such as viruses, hormones, drug residues and chemicals such as Glyphosate safe from drinking water.
- ✓ All models of the Membratech® A-Series are equipped as standard with the Secure-OPT security system, which monitors all performance-relevant processes around the clock.
- ✓ Depending on the model, the Membratech® A-Series generates between 80-300 liters/hour and offers you up to four types of water. Choose between room tempered, cold, hot or sparkling water.
- ✓ All models of the Membratech® A-Series are equipped as standard with a tank-less direct-flow system. The risk of contamination of the storage tanks is thus excluded.
- ✓ As standard, the Membratech® A-Series is equipped with a patented water-cooled engine. The advantages are reflected in low heat development and low electricity costs.
